## Summary

Python Developer with internship experience building backend applications using core Python, OOP, data structures, file handling, and exception handling. Skilled in FastAPI, REST APIs, SQL, and database connectivity, with a strong focus on clean, testable, standards-compliant code and Git-based collaboration. Quick to learn new tools and frameworks.

## Technical Skills

**Core Python:** Loops, Functions, Classes, OOP, Lists, Tuples, Sets, Dictionaries, File Handling, Exception Handling

**Languages:** Python, SQL, JavaScript, HTML, CSS

**Databases:** PostgreSQL, MongoDB, MySQL, Database Connectivity

**Tools & Practices:** Git, GitHub, Debugging, Testing, Coding Standards, Docker

**Backend Development:** FastAPI, Flask, REST APIs, JWT Authentication, RBAC, WebSockets

**Machine Learning:** Scikit-learn, PyTorch, TensorFlow, HuggingFace Transformers

## Experience

**Backend Developer Intern**

*IT IDOL Technologies*

**January 2026 – May 2026**

*Valsad, Gujarat, India*

**Project: IT Asset Management System** | Python, FastAPI, PostgreSQL, JWT, Docker

- Built a production-ready asset management system, delivering **20+ documented REST APIs** with clean, reusable code following consistent coding standards.
- Ensured stable database connectivity by writing validated SQL queries and handling exceptions for invalid input and failed connections.
- Secured resources across three roles by implementing **RBAC** with JWT authentication and structured request validation.
- Improved code quality by debugging and testing endpoints through Git-based reviews.

## Projects

**Hiring Outcome Prediction System** | *Python, Flask, Scikit-learn*

**June 2025**

- Built an ML web application predicting hiring outcomes with **87% accuracy** through file-based preprocessing and feature engineering.
- Deployed the trained model using Flask for real-time predictions through a web interface.

**MindBridge – AI Mental Health Chatbot** | *Python, FastAPI, MongoDB, PyTorch*

**May 2026**

- Built a secure FastAPI backend for Patients and Doctors with a scalable MongoDB schema.
- Integrated a transformer model for **28-class real-time emotion detection** and automated crisis escalation.

**AI-Powered Healthcare CRM** | *Python, React, MySQL, Alembic*

**July 2026**

- Built a full-stack CRM with a React frontend and Python API backend for medical representatives.
- Engineered an AI agent to fetch interaction history and generate relevant follow-up talking points.

## Education

**RNGPIT, Bardoli**

*Bachelor of Engineering in Computer Science Engineering*

**2022 – 2026**

*CGPA: 7.35*

**LMP & MCZ Higher Secondary School**

*Higher Secondary Certificate (HSC)*

**2020 – 2022**

*Percentage: 55%*

## Certifications

**Artificial Intelligence & Machine Learning** | *edunet*

**July 2025**

**ChatGPT + Excel: AI Enhanced Data Analysis & Insight** | *Coursera*

**January 2025**

**SAP Foundation Course on Python Programming** | *SAP*

**November 2024**

**Python Programming, Data Analysis, AI & SAP Chatbot Development** | *edunet*

**October 2023**
