📍 Bilimora, Gujarat, India

Summary

Python Backend Developer with professional internship experience designing secure, scalable applications using Python, FastAPI, PostgreSQL, and MongoDB. Highly skilled in building robust RESTful APIs, implementing JWT authentication, Role-Based Access Control (RBAC), and utilizing Docker for seamless deployment. Complementing this strong backend foundation is practical experience integrating applied machine learning models—including PyTorch, Hugging Face, and Scikit-learn—into production environments to enable AI agents and predictive features. Passionate about delivering maintainable, database-driven architectures that effectively bridge scalable infrastructure with intelligent capabilities.

Education

RNGPIT, Bardoli <i>Bachelor of Engineering in Computer Science Engineering</i>	2022 – 2026 <i>CGPA: 7.35/10</i>
LMP & MCZ Higher Secondary School <i>Higher Secondary Certificate (HSC)</i>	2020 – 2022 <i>Percentage: 55%</i>
LMP & MCZ Higher Secondary School <i>Secondary School Certificate (SSC)</i>	2019 – 2020 <i>Percentage: 60%</i>

Experience

Backend Developer Intern <i>IT IDOL Technologies</i>	January 2026 – May 2026 <i>Valsad, Gujarat, India</i>
--	---

Project: IT Asset Management System | Python, FastAPI, PostgreSQL, JWT, Docker, Railway

- Developed a production-ready **IT Asset Management System** with inventory, client asset management, ticketing, and analytics modules to streamline organizational asset workflows.
- Built and documented **20+ RESTful APIs** using FastAPI and PostgreSQL with JWT authentication, request validation, exception handling, and Swagger/OpenAPI documentation.
- Implemented **Role-Based Access Control (RBAC)** for Admin, Support Engineer, and Employee roles, ensuring secure access to protected resources.
- Containerized the application using **Docker**, deployed it on **Railway**, and validated APIs using Postman for reliable deployment and testing.
- Collaborated using Git and GitHub through feature branches, pull requests, and code reviews to maintain clean and version-controlled development.

Project: MindBridge – AI Mental Health Chatbot | Python, FastAPI, MongoDB, PyTorch, HuggingFace, WebSockets

- Developed the backend of an AI-powered mental health platform using FastAPI with secure workflows for Patients and Doctors.
- Designed a scalable MongoDB schema and integrated the **GoEmotions Transformer** model using PyTorch and HuggingFace for **28-class real-time emotion detection**.
- Implemented low-latency real-time communication using **WebSockets** to enable continuous messaging between patients, doctors, and the AI service.
- Engineered an automated crisis escalation workflow that detects high-risk messages and instantly transfers users to a live counselor.
- Applied modular backend architecture, Git-based version control, and API testing using Postman to deliver maintainable and production-ready services.

Projects

AI-Powered Healthcare CRM <i>Python, React, MySQL, AI Agents, Alembic</i>	July 2026
--	------------------

- Developed a full-stack Customer Relationship Management (CRM) application tailored for medical representatives, featuring a React frontend and a robust Python API backend.
- Designed and managed a relational PostgreSQL database to track healthcare professionals, medical products, and interaction logs, utilizing Alembic for streamlined schema migrations.
- Engineered an intelligent AI agent architecture with custom tools to automatically fetch interaction histories, schedule calendar follow-ups, and generate contextual talking points via natural language chat.

- Built a machine learning web application to predict candidate hiring outcomes, achieving **87% prediction accuracy** through data preprocessing, feature engineering, and model optimization.
- Integrated the trained Scikit-learn model into a Flask application, enabling real-time predictions through a user-friendly web interface.

- Developed a Telegram-based legal assistance chatbot using SAP Conversational AI to provide accessible guidance across multiple legal topics for Indian citizens.
- Designed conversational workflows and intent recognition to improve query resolution while promoting easier access to legal information.

Technical Skills

Programming Languages: Python, SQL, JavaScript, HTML, CSS

Backend Development: FastAPI, Flask, REST APIs, JWT Authentication, RBAC, WebSockets

Databases: PostgreSQL, MongoDB, MySQL

API Tools: Postman, Swagger/OpenAPI

Deployment & DevOps: Docker, Railway, Netlify

Version Control: Git, GitHub

Machine Learning: Scikit-learn, PyTorch, TensorFlow, HuggingFace Transformers

Data Analysis: Pandas, NumPy, Matplotlib, Power BI

Core Concepts: OOP, DBMS, Data Structures, Feature Engineering, Supervised Learning, Unsupervised Learning

Certifications

Data Analysis and Visualization Foundations | *IBM Cognitive Class*

January 2025

ChatGPT + Excel: AI Enhanced Data Analysis & Insight | *Coursera*

January 2025

SAP Foundation Course on Python Programming | *SAP*

November 2024

Python Programming, Data Analysis, AI & SAP Chatbot Development | *edunet*

October 2023
